

# WHY FOSTER?

Fostering enables us to increase the number of homeless pets we can save by placing them in temporary foster homes. Foster homes also give pets a warm, loving environment to heal, grow and flourish. As a foster parent, your role is to welcome a pet (or pets) into your home and provide food, water, toys and lots of love.

## WHAT IS THE COMMITMENT?

The amount of time and effort required of foster volunteers varies greatly, depending on the needs of the animal(s) being fostered. Some animals will need no more care than an existing family pet while other animals require more.

## SPACE

Any spare room can make a great foster space!

## EXPERIENCE

There is no previous experience necessary!

Our staff will work with you to make sure that whomever you take home, will work for your lifestyle.

## WHO IS IN NEED?

As a foster parent, you might take care of a litter of kittens for a week or two, maybe an older cat being treated for an upper respiratory infection, or a young dog who has never been inside a home and doesn't know how to play. Whatever the situation, it is because of foster families that we can continue to take on cases like these.

Underage

Sick / Injured

Behavioral / Socialization

## HOW DO I START?

If fostering sounds like the right fit for you, start by filling out the foster application below. This will allow our team to see what kind of animals might be a good fit for you.
